Overview

With Handy Safe application you can have all important information in one place, safe, secure, easy to access, and always with you.

You can store credit card PINs, calling cards, user names, passwords, codes, accounts (email, Internet, shopping, bank), web pages, addresses, and much more.

Handy Safe has over 35 unique information cards to store everything. Over 35 built-in icons to associate with your cards help you get organized in style.

Handy Safe password protection and strong 448-bit data encryption (Blowfish) keep your information private and secure.

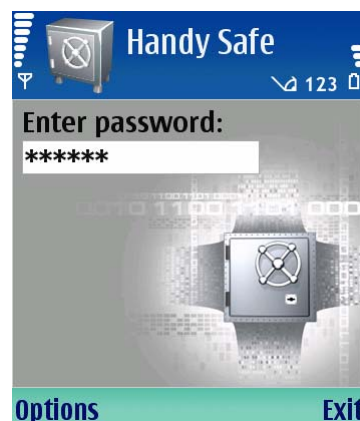

Login

When you start Handy Safe, you go to the login view.

At the first start, Handy Safe will prompt you to set a password for your data. Remember it, because if you forget your password, you won't be able to access your data.

Next time when you start Handy Safe, it will prompt you to enter your password. Type the password in the edit box and select **Options > Login**.

✂ If you forgot your password, select **Options > New database**. You will lose all your data, but will be able to use Handy Safe further.

Folders

The main view of Handy Safe shows the list of the folders. They are **Business**, **Personal**, **Samples**, **Unfiled**, and **Custom types**.

Custom types folder is for your own custom types (templates). The other folders will help you to organize your cards.

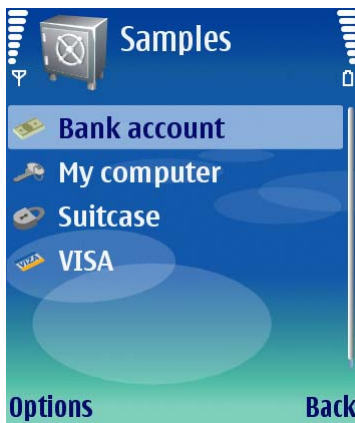

- To create new folder, go to **Options > New folder**.
- To rename a folder, scroll to the folder and go to **Options > Rename**. **Unfiled** and **Custom types** folders cannot be renamed.
- To delete a folder, scroll to the folder and go to **Options > Delete**. The folder must be empty. Also **Unfiled** and **Custom types** folders cannot be deleted.
- To find a card, go to **Options > Find** and enter text to search for.
- To change Handy Safe password, go to **Options > Change password**.
- To edit the settings, go to **Options > Settings**.

Cards

Open a folder to see the list of its cards.

- To create a new card in the folder, go to **Options > New**, then select the card type from the list.
- To view details of a card, select the card and go to **Options > Open**.
- To delete a card, select the card and go to **Options > Delete**.
- To move a card to another folder, select the card and go to **Options > Move to folder**, then select the target folder from the list.
- To find a card, go to **Options > Find** and enter text to search for.

Custom types

You can create your own types of cards, not only use the standard types.

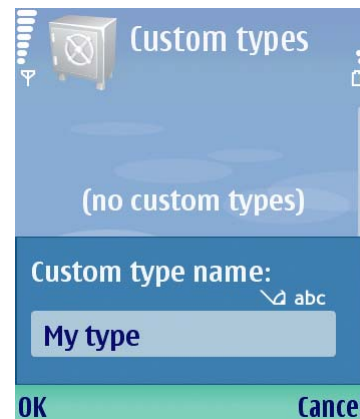

To create a new type:

1. Go to **Custom types** folder.
2. Select **Options > New** and enter a name for new custom type.

Then you can add fields to this custom type via **Options > Add field**.

To change the icon, go to **Options > Change icon**.

Next time when you start creating a new card, this custom type will appear in the second (**Custom**) page in the **Select type** list.

Card preview

To view details of a card, select the card and go to **Options > Open**.

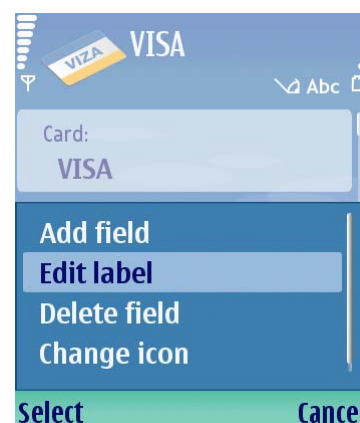

- To edit the card, go to **Options > Edit**.
- To send the card via SMS or e-mail, go to **Options > Send**.
- To navigate to the next/previous card in the current folder, press the joystick left/right.
- To use a field in the card, select the field and go to **Options**. Depending on the field content, you can make a call; create SMS, MMS, or e-mail; open URL.
- To copy a field to the clipboard, select the field and go to **Options > Copy**.

Editing cards

To edit a card, select the card in the list and open it, then go to **Options > Edit**.

- To add a new field, go to **Options > Add field**. Then select the field type (**Text**, **Number** or **Date**) and enter the field name (label).
- To delete a field, scroll to the field and go to **Options > Delete field**.
- To rename a field, scroll to the field and go to **Options > Edit label**.
- To change the card's icon, go to **Options > Change icon**.

Synchronization

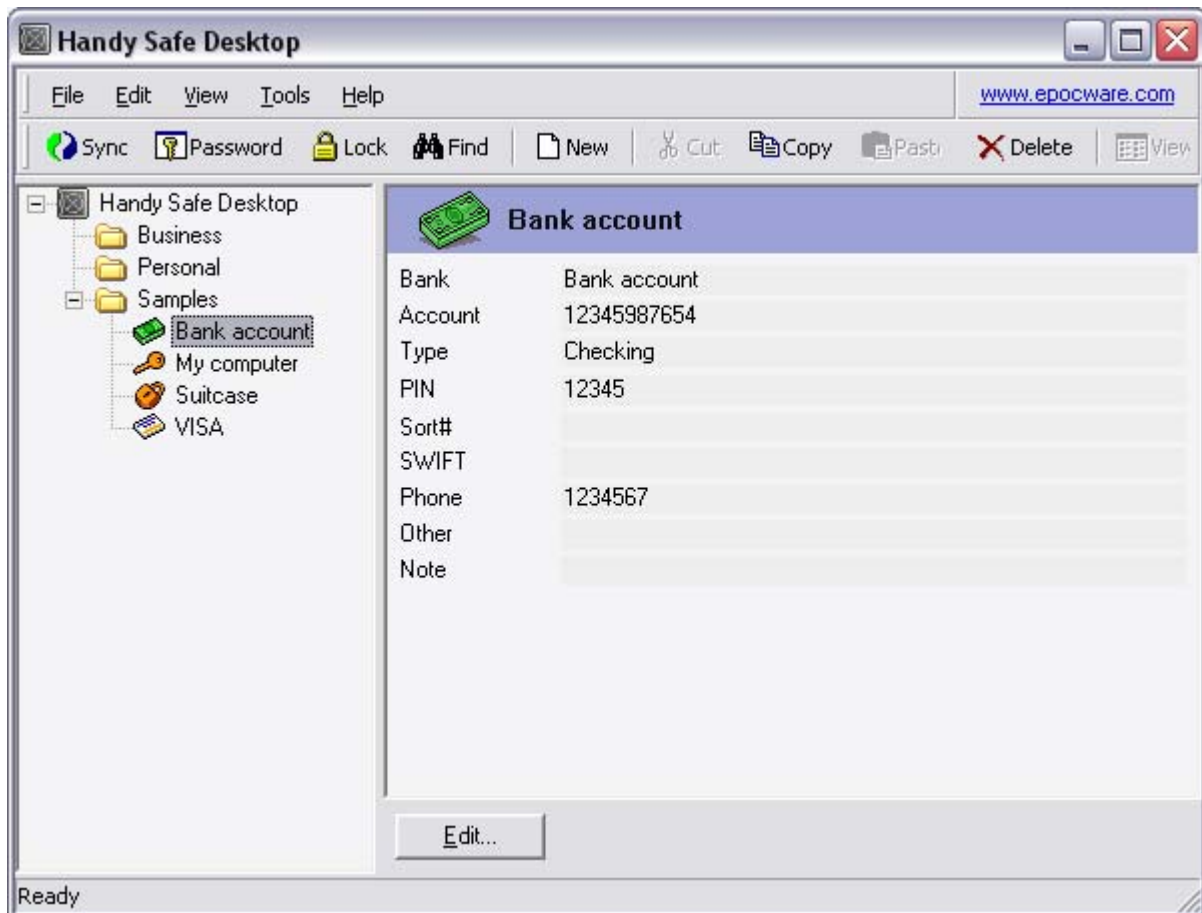

To synchronize your data between phone and PC you need:

- **PC Suite** software installed in your PC. You can download it from www.nokia.com.
- **Handy Safe Desktop** software installed on your PC. You can download it from www.epocware.com.

Synchronization steps:

1. Connect your phone to PC via **USB cable, Infrared,** or **Bluetooth**.
2. Start **Handy Safe Desktop** on PC (via Start Menu> Programs> Epocware> Handy Safe Desktop).
3. Press **Sync** button on the toolbar in Handy Safe Desktop.

Your data will be synchronized.

- ☞ Handy Safe stores its data in two files: **Safe.ind** and **Safe.dat** in the **Phone memory\Others\HandySafe** folder on the phone.
- ☞ Handy Safe Desktop stores its data in the same two files: **Safe.ind** and **Safe.dat** in the **C:\Program Files\Epocware\Handy Safe Desktop** folder on the PC.

Registering

You can use this application during 7-day demo period. Then you will need to register. You can register on-line at our web site <http://mobile.epocware.com>.

After a purchase you will get your serial number by e-mail and a link for downloading the full version of the application. Serial number consists of 2 groups of 8 digits, e.g. 12345678-12345678.

Install the full version over the trial one to keep all your data and settings. Enter the serial number at the first application start.
