## About the game

We are glad to offer you a unique collection of solitaires –about 250 solitaires are gathered in a single game called “**Can't Stop Solitaires Collection**”. If you are fond of card games, this collection gives you a great opportunity to play a new solitaire every day. You can add your favorite games to the “Favorites” group and start them quickly any time you want to cheer up.

### System requirements

The game is designed for Symbian UIQ 3.0 smartphones, for example, Sony Ericsson P990i/ W950i/ M600i.

### Useful programs

Pay your attention to other useful programs developed by Epocware/Paragon Software Group for smartphones based on Symbian OS:

	<p><b>SlovoEd</b> is a multilingual dictionary with easy-to-use interface, rapid access, precise translations and unique compression technology.</p>
	<p><b>Handy Day</b> is your personal assistants that cares about your meetings and tasks, organizes and saves your time. Handy Day 2005 Professional and Handy Day 2005 This is a great tool for planning and smartphone interface personalizing.</p>
	<p><b>Another Ball.</b> We are glad to offer you a classic arachnoids game with a magic with numerous presents and with different exiting levels.</p>
	<p><b>Handy Safe</b> is a perfect assistant for secure and convenient managing all of your important information in one place. Data password protecting and encrypting will keep your information in safety. Due to the synchronization with PC you can easily enter and edit the information.</p>
	<p><b>Handy Expense</b> allows you to record business expenses as they occur, thus, reducing the amount of time spent on creating an expense report and reducing the amount of non-reported expenses. Ability to analyze the information helps to control all the expenses and synchronization with PC allows easy report creating.</p>
	<p><b>Handy Weather</b> is a program for receiving the weather forecast for the next 5 days for any place on the Earth. It safes your time for searching the weather forecast and keeps you from the unexpected weather changes.</p>

Visit <http://www.epocware.com> if you want to try the trial-versions and get the full versions of the described programs.

### Registration and demo-version limitations

The longer you play the unregistered game, the more often you see the message about registration procedure when starting a new solitaire. To register your copy of the game you should enter the registration code in the following dialog: menu “**More>Register...**”

If you use the demo-version of the game and decide to buy it you can make your order immediately from your smartphone. For this purpose tap **Buy** button in the Registration window.

After you fill in all the forms the Registration code will be sent to the e-mail which you mentioned for ordering the game.

### Installation

You can install "**Can't Stop Solitaires Collection**" directly from the smartphone or from the desktop computer.

#### Installation from the desktop computer

**ATTENTION!**

*Be sure that the program for smartphone connection with PC is installed on your PC. You can find the necessary program on the disk which is supplied with smartphone.*

To install the game do the following:

1. Establish the connection between your smartphone and the desktop computer using Bluetooth or Infrared port or a cable.
2. Run the installation \*.sis files on the PC and follow the instruction of the installation program.

**NOTE:**

*During the installation you can choose where the game should be installed: in the main memory or on the expansion card.*

#### Installation from the device

To install the game from your smartphone do the following:

1. Copy the installation file (\*.sis) to your smartphone (using Bluetooth or Infrared or by some other method).
2. Run the installation \*.sis file on the smartphone.

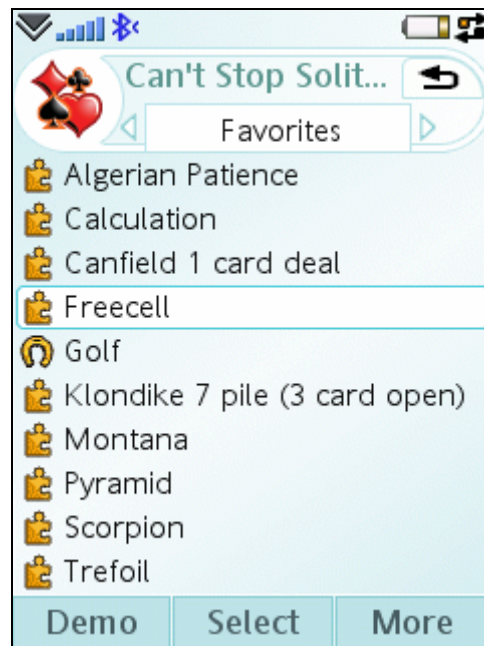

After the installation the «**Can't Stop Solitaires Collection**» icon  should appear in the list of applications (**Main Menu>Tools> Can't Stop Solitaires Collection**).

## How to play

The «Can't Stop Solitaires Collection» icon  should appear in the list of applications (**Main Menu>Tools> Can't Stop Solitaires Collection**) after installation.

### Select Solitaire

When you run the program for the first time, you proceed to the **Select game** window.

To simplify the navigation in the numerous solitaires there are 3 tabs (**Favorites**, **All games tree** и **All games list**) in the Select Solitaire window.

- **Favorites** tab includes only the most popular solitaires. You can edit this list, for example by adding your favorite games.
- **All games tree** tab includes all the solitaires sorted to folders according common rules.
- **All games list** tab includes all the solitaires sorted in alphabetical order..

To start the game select it from the list and use **Select** functional key or choose **Play** item in menu **More**.

### Menu in the Select solitaire window

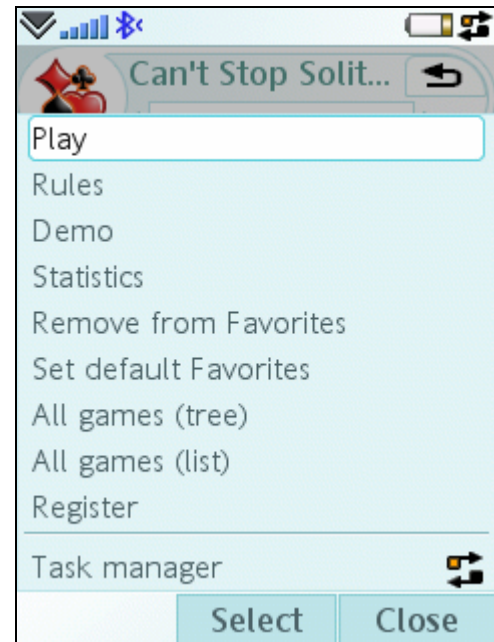

If you want to get the more information about the solitaire you have chosen use the functional **More** button.

When you tap **More** context menu appears which includes the following items:

1. **Play.** Starts selected solitaire
2. **Rules.** Allows to see the selected solitaire rules.
3. **Demo.** Use this item to view the pre-recorded game to see how to play the current solitaire. Use **Done** to stop the demo.
4. **Statistics.** Allows to see the statistics for the current solitaire.

In the appeared window you can see the total number of the played games for the current solitaire (**Total**), how many of them were won (**Wins**) and lost (**Losses**).

Press **Clear** if you want to clear statistics. Press **Done** to return to the game.

5. **Remove from Favorites/Add to Favorites.** Allows to add the selected solitaire to favorite list.
6. **Set default Favorites.** Allows to restore to initial favorite list.
7. **All games tree.** Allows to proceed to **All games tree** tab.
8. **All games list.** Allows to proceed to **All games list** tab.
9. **Register.** Allows to register your copy of the game. This item is available only in the demo-version of the game.

### How to move the cards

To move the cards you should select the necessary one of pile of cards by stylus and without raising the stylus from the screen move it to the desired position.

**NOTE:**

*Also you can use the Scroll wheel to move the cards. For this purpose move the cursor which appears when you start scrolling the wheel to the necessary card and push the wheel. The card will be moved to available position automatically.*

### Quick card moving

To move the cards quickly tap once the card or pile of card with stylus and the program will move the card or pile of cards to the available position. In 95% cases it is the same you wanted to move the card. If there are several different positions and the card was moved to undesired one just tap it with stylus again and it will be moved to another available position.

## Complex card moving

- Let us take an example. While playing one of “Freecell” solitaires you want to move three cards (one after another) to suitable positions. In this case you should move the first (upper) card to a vacant position (free cell) in the top line first, the second card to a vacant position (free cell) in the top line too, the third – to a position you want, and then the first card and the second to a position you want. The program can perform all this sequence of actions instead of you. Just tap the third card by the stylus.
- Also you can place all the playable cards to the suitable positions automatically for the current game by tapping **Collect All** or choosing **More>Collect all** item.

## Long piles of cards

If you have built up a long pile of cards on the screen, the long pile will be stacked into several layers so that last cards will be shown above first cards. To see cards placed under the upper layer you should tap the upper layer by stylus and it will move to the right for some time. Tap any point of background to move them back.

## Menu in the Game window

Each solitaire has **More** functional button which includes the context menu with the following items:

1. **Game.** This section includes menu with the following items:

- ♦ **Select game.** Use this item to proceed to the Select Solitaire window. To return to the current game use hardware **Back** button.
- ♦ **New game.** Use this item to start the new game of the current solitaire.
- ♦ **Restart game.** Use this item to repeat the same layout for the current solitaire. (Restores the initial layout for the current solitaire).
- ♦ **Statistics.** Allows to see the statistics for the current solitaire.

2. **Deal again.** Use this item to deal the cards again and continue the current game. (This option is available only if it is allowed by the solitaire rules)

3. **Undo.** Allows you to cancel any number of the cards moves one by another.

4. **Redo.** Allows restoring the latest undone card moving. On by one you can restore any number of undone card moving.

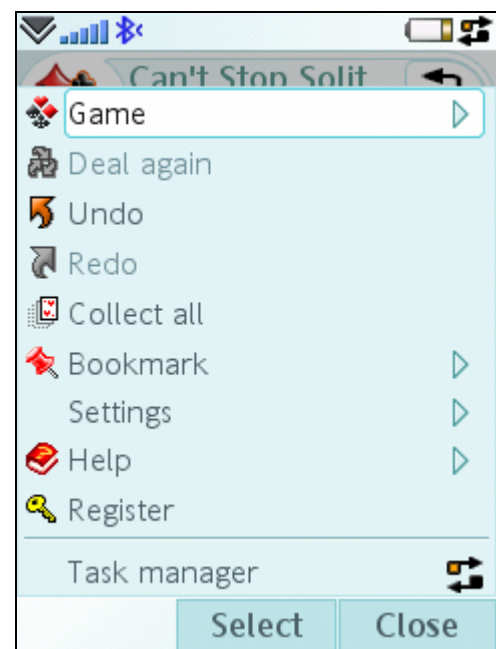

5. **Collect All.** Use this item to place all the playable cards to the suitable positions automatically for the current game.

6. **Bookmark.**

- ♦ **Set bookmark.** Use this menu item to set a bookmark for the current card position if during the game you have different ways for card moving.

If you cancel this card position using **More>Undo** item then the bookmark disappears. You can set as much bookmarks as you need.

- ♦ **Back to bookmark.** Use this menu item to return to the bookmarked card position.

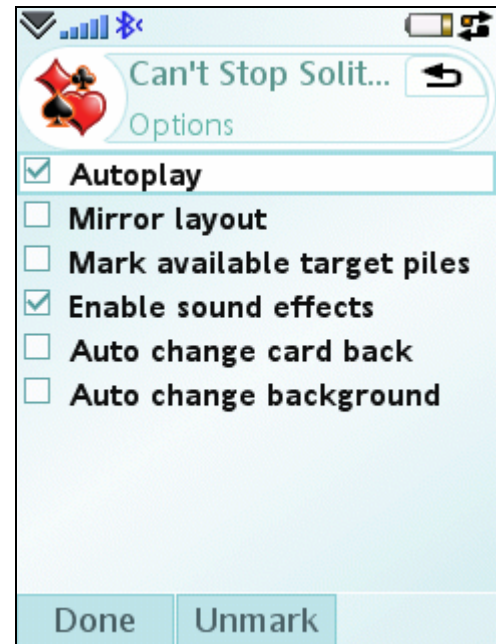

If you set 2 bookmarks and tap **Back to bookmark** the game will return to the nearest bookmark. If you tap this item again the game will return to the previous bookmark and the first one will disappear and only 1 bookmark will be left.

### 7. Settings. Use this item to proceed to the **Settings window**.

#### ◆ Options

- **Autoplay.** If you check this box you enable all the playable cards moves to the suitable positions automatically.
- **Mirror layout.** When you check this item the card layout will be mirrored. It can be useful if you are lefthander or just play with using left hand..
- **Mark available target piles.** If you check this item available moves for selected card will be shown.
- **Enable sound effects.** If you uncheck this box, the sound effects for card movement will not be used.
- **Auto change card back.** If you check this box the card back will be changed automatically at random way at every start of the new game.
- **Auto change background.** If you check this box the background will be changed automatically at random way at the start of the new game.

◆ **Card back.** Select the desired card back to apply it.

◆ **Background.** Select weather a gradient fill or a built-in image be used for the tableau.

### 8. Help.

- ◆ **Contents.** Allows to read help about general game features.
- ◆ **Rules.** Allows to see the selected solitaire rules.
- ◆ **Demo.** Use this item to view the pre-recorded game to see how to play the current solitaire. Use **Done** to stop the demo.
- ◆ **Available moves.** Select this item to see the moves available from the current position.
- ◆ **About.** Select this item to learn more about this version of the game.

9. **Register.** Allows to register your copy of the game. This item is available only in the demo-version of the game.

### Game exit

Press the hardware button "**Back**" to exit the game.

The current game position will be saved and will be restored when you start the program next time.

## Uninstallation

To uninstall «**Can't Stop Solitaires Collection**» game from your smartphone do the following:

1. Choose **Main menu>Tools>Control panel>Other>Uninstall**.
2. In the appeared list choose «**Can't Stop Solitaires Collection**» and tap **Uninstall**.

## Useful information

### How to get the registration code

We invite you to our web-site <http://www.epocware.com/>, devoted to applications for smartphones developed by Epocware/Paragon Software Group.

Visit our site: <http://www.epocware.com>, and select the program you want to purchase; after this you can get the registration code using secure on-line ordering with your credit card via the e-Shop. Do not worry, we never get your credit card information, ordering is proceeded through specialized American and European e-commerce systems.

This way of payment provides the "real-time fulfillment", that means that your registration code will be emailed to you immediately.

### E-care

We recommend that you register in our **E-Care** system which helps to automatically register and update your programs. .

**E-Care** allows you to:

- get free updates for your software;
- recover your copy of the program or registration code if you accidentally lost it;
- get in touch with our support team;
- optionally get notifications about releases of the new version of the program.

The details of the registration procedure and the E-Care system you can find at: [http://www.penreader.com/company/e\\_care.html](http://www.penreader.com/company/e_care.html).

### Knowledge Base

Support knowledge Base is available for our customers! You can find there detailed answers to all frequently asked questions about the most popular programs of Epocware/Paragon Software Group.
